

# CIRCUS THERAPY PROGRAMS

For Education Support Centres & Students with Additional Needs.

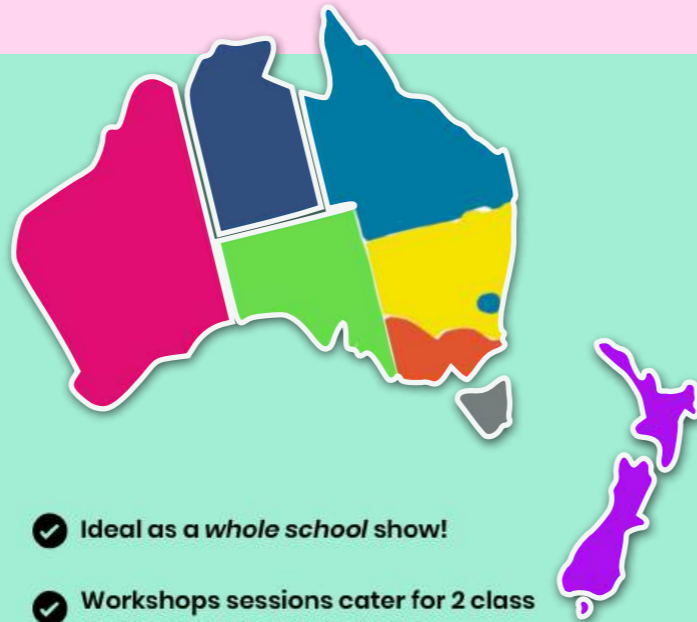

**Circus Therapy** is a unique program designed for Education Support Centres and students with additional needs, offering a fun and purposeful way to promote **social, physical, emotional, and cognitive** development. Through engaging group activities, students enhance **social development** like interpersonal skills, teamwork, and cooperation, all in a supportive and inclusive environment. Whether it's juggling, hula-hooping, or balancing acts, these activities help students connect, interact, and grow together.

Our workshops also focus on **physical development**, improving fine and gross motor skills, coordination, and strength. Students engage in hands-on exercises that build rhythm, balance, and physical wellbeing while learning through play. At the same time, **emotional development** is nurtured, as participants build confidence, resilience, and self-esteem, celebrating their achievements in a safe space designed for success.

Beyond physical and emotional growth, **Circus Therapy** aids **cognitive development**, helping with critical thinking, problem-solving, and cognitive skills. Students practice timing, rhythm, and spatial awareness while having fun and mastering new challenges. Our inclusive approach ensures that everyone, regardless of ability or personality, can participate, thrive, and create lasting memories.
